Art Unit: 2872

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

Claims 1-20 are allowed.

Claims 1-20 are allowable over the prior art of record for at least the reason that even though the prior art discloses methods for fabricating a color wheel, where a masking plate is positioned on one of the surfaces of the substrate to be coated with the color filter layer, the prior art fails to teach or reasonably suggest, an apparatus for use in forming color segments of a color filter on a substrate which is coated with the colored segments, the apparatus comprising at least one pair of first and second masking plates, said first masking plate being adapted to overlie on a first surface of the substrate, said masking plates having corresponding cutout parts, a security device for securing said first and second masking plates, and aligning said first and second cutout parts, whereby said second masking plate presses said first masking plate tightly against the substrate, as set forth by the claimed combination.

Kamei (US 2004/0084397, Fig. 2) discloses a method for forming color segments on an annular substrate, wherein a masking plate is positioned on the top (step 2), and subsequently, on the bottom (step 6) surface of the substrate. Takao (US 2004/0246218, Fig. 4) and Asakawa (Fig.

2) disclose a method for forming color segments on an annular disk, where a single masking

plate is positioned on the top surface of the disk. Niwa (US 6,876,505, Fig. 2) discloses a method

Page 3

for making a color wheel, where a pair of masking plates is positioned on the top and bottom

surface of the substrate simultaneously. None of Takao, Asakawa, and Niwa is a prior art

reference.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Dr. Leo Boutsikaris whose telephone number is 571-272-2308.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
